

# Did you have a Traumatic Brain Injury? Do you have difficulty with memory?

Are you between 20-55, right-handed, English speaking and otherwise healthy?

If so, you may be eligible to volunteer for a study investigating cognitive rehabilitation treatment and prospective memory

## Study consists of:

Individualized cognitive rehabilitation

Brain injury education

fMRI of your brain

Prospective memory assessment -your ability to remember to do something in the future

Participants who complete the full study receive gift cards totaling \$20 per hour
